

**LEMONS BRING OUT
THE HIDDEN BEAUTY**

Make this lotion for very little
cost and just see
for yourself.

An attractive skin wins admiration. In social life and in business the girl or woman whose face and hands show evidence of constant care enjoys a tremendous advantage over those who do not realize the value of a healthy skin and a spotless complexion.

At the cost of a small jar of ordinary cold cream one can prepare a full quart of this wonderful lemon skin softener and complexion beautifier, by squeezing the juice of two fresh lemons into a bottle containing three ounces of orchard white. Care should be taken to strain the juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan, and is the ideal skin softener, smoother and beautifier.

Just try it! Get three ounces of orchard white at any pharmacy and two lemons from the grocer and make up a quart of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It naturally should help to soften, freshen, bleach and bring out the roses and beauty of any skin. Adv.

**Salter Bridge work**

Salter Bridge work stands pre-eminent for quality, service and durability. By its use we supply one or more missing teeth, building to or more teeth in either jaw. All unnecessary display of gold is carefully avoided. The size and shade of the surrounding natural teeth are duplicated, perfectly, making detection impossible.

Salter Bridge work is fully guaranteed. The cost varies with the material and quality of teeth selected.

HURRY THE SCHOOL LUNCHES, THE BOARD OF EDUCATION IS TOLD AT PUBLIC HEARING

People Are Tired of Delay in
Caring for Undernour-
ished Children.

By Sophie Irene Loeb.

A hearing was held late yesterday afternoon before the Board of Education on the subject of school lunches. As has been stated in these columns, this matter of the Board of Education taking over the school lunches has been retarded for over a year, it being held up by a committee of the board for one reason after another.

The city favors school lunches, and private organizations have for nearly twelve years served lunches in the school. After its great work was thus demonstrated it was finally deemed a public school function.

The following facts came before the board yesterday:

In January, 1917, the Board of Aldermen conducted an investigation and recommended that school lunches be taken over by the Board of Edu-

cation. This was done only because the Board of Aldermen found itself without power to appropriate funds for lunches unless the Board of Education asked for them.

Thus the city authorities showed a willingness to appropriate funds, but the aforesaid committee of the Board of Education held up the matter until the Board of Aldermen adjourned for the summer.

It was not until late in the fall, when the budget was made up last year, that a report was forthcoming and this report merely asked for an experiment fund of \$50,000. This money became available Jan. 1 of this year and as yet not even an experiment has been made. The same committee insisting on more investigation as to how to do it.

A report has finally been received from this committee, but it now objects to spending \$11,000 necessary for the work of inaugurating a system. Superintendent of Schools, Dr. Eitinger, reported favorably on the matter and so stated to the board, pointing out that it was necessary to secure the best service possible to properly install a system.

Mrs. Murray's report suggested using but \$3,000 for administration. A number of speakers were present representing various organizations of the city. The unanimous feeling was against any further delay and the sum required should be used for this most important purpose.

I pointed out to the members of the board that The Evening World had carried a campaign in this connection and had by public subscription equipped several schools with lunch service, also for several years a part of this money was expended to take care of anemic children and children suffering from malnutrition by providing a morning meal for them. Several thousand dollars were thus spent in the interest of many children who came to school underfed and undernourished.

I explained how the New York School Lunch Committee and the Brooklyn School Committee provided thousands of portions of food to the children annually.

There is no need for further experiment—all this work speaks for itself, but if it is necessary for the Board of Education to spend \$11,000 to install a suitable system and that \$50,000 be used for this purpose, this preliminary work could be accomplished before the beginning of next term, when a complete system could be recommended to the Board of Estimate and sufficient funds secured to provide a city-wide system.

The \$11,000, as was explained, was for yearly service, and thus, as soon

as a few schools are properly demonstrated, others can be equipped on the same overhead charge.

New York City should lead in this work, where the need is so imminent, urged. As it stands to-day, this city has lost over a year and a half in providing for the millions of school children an opportunity to secure one whole, some meal a day at cost, to say nothing of the educational advantages to be derived. While other cities, such as Philadelphia and Cleveland, have gone forward as well as large centres in Europe, we have practically stood still in the matter of properly handling this matter.

The general feeling expressed by the speakers showed that almost every organization of note in the city is now behind this work as a public function. Among the other speakers who expressed views in this connection were:

Dr. Thomas Wood, Commission on Health Problems of National Council of Education and American Medical

Association; Miss Winslow, President Home Economics Association; Dr. Henry Dwight Chapin, New York Academy of Medicine; Mrs. Heas, Woman's City Club; Miss Harriet Johnson, Bureau of Educational Experiments; Mrs. Frederick, Peterson, Miss Sally Lucas Jean, Child Health Organization; Dr. Lewinski-Corwin, Secretary Public Health Committee, Academy of Medicine; Mrs. M. K. Simkovitch, Director of Greenwich House; Mrs. Seth Bliss Hunt, Chairman Child Welfare Division Social Service Bureau, Bellevue Hospital; Mrs. Irving Lehman, N. Y. section of Council of Jewish Women; Miss Olive Wade, Civic Federation; Mrs. Fred Stein, Federation of Child Study; Mrs. Elmer Blair, State Board of Charities; Col. Smith, Chairman Educational Committee, Chamber of Commerce; Miss Blake, Principal, Public School No. 6; Mr. William K. Franklin, Principal, Public School No. 40; Mrs. Francis Wood, Municipal League; Dr. Mary Swarts Rose, Columbia; Miss Lillian D. Wald, Henry Street Settlement, and Ned Stein.

Are the Lives of 400,000 Children Worth \$6,000,000?

Suppose 400,000 Kiddies in New York
Were Dying of Starvation

What Would You Do About It?

Children the world over are pretty much the same—little mites of humanity who have no say in their coming—and 400,000 of them—Armenian, Persian, Syrian and Greek refugees—face starvation unless New York helps them.

We believe the 5,000,000 people in New York will never let it be said that 400,000 children—victims of Turkish oppression and brutality, many of them—perished because New York would not raise \$6,000,000 to save them.

The **ARMENIAN AND SYRIAN RELIEF COMMITTEE** has said
"They Shall Not Perish"

All funds are cabled through the Department of State. The Red Cross is not organized for Relief Work in these sections.

ONE WAY OF DOING IT NOW

MR. CLEVELAND H. DODGE, Treasurer Armenian and Syrian Relief Committee, No. 1 Madison Avenue, New York City.

Dear Mr. Dodge:

I am very glad, indeed, to make this little offering in the name of God and His Charity for the relief of the Armenians, Syrians and Persians. Please send me literature.

Yours for "THEY SHALL NOT PERISH"

Name Address C.I.

How Great Organization Reduces Cost

ARMOUR and Company grew to be a great business institution by saving the things that formerly were thrown away on the farm.

Pig bristles on the farm are worthless. Through our methods they are utilized in brush-making. Certain glands in hogs, once thrown away when the farmer did his own killing, are now made into medicinal preparations of high value. Even the hoofs and bones are turned to commercial use.

Each of these products is useful, adds something to life, health or comfort.

EDIBLE PORK PRODUCTS

Livers	Boston Style	Tails
Shoulders	Butts	Kidneys
Tenderloins	Cala Butts	Skins
Pork Tips	Blade Butts	Brains
Spare Ribs	Neck Ribs	Heads
Hocks	Ham Butts	Slip bones
Trimmed Neck	Rough Sides	Sweetbreads
Bones	Hams	Feet

INEDIBLE

Stearin	Bone Charcoal	Bone Flour
Lard Oil	Phosphate of Lime	Covers for Glass
Grease	Granulated Bone	Stoppers
Glue	Blood Meal	Lard Containers
Tankage	Meat Meal	Sausage Casings
Leather	Curled Hair	Bristles for Brushes

The farmer shares in the returns from all these products. If it were not for the size of this organization and the facilities for transforming every usable ounce of the hog, the packer would either have to

charge the public more for pork or buy hogs from the grower at a lower figure.

The value of anything depends upon its ultimate usefulness. It is only because concerns like Armour have been developed to secure the utmost utility out of the livestock they buy that it is possible to pay farmers more for their animals and yet provide food for the public at true-value levels.

With large volume it becomes possible to make the heavy investments in machinery and equipment necessary to develop new processes and new products. Often it costs hundreds of thousands of dollars in research and experiment before a single pound of some new product can successfully be put upon the market. Such preliminary work is usually beyond the scope of institutions which lack these facilities.

It is in this way that the fundamental benefits of big business are made available to the public. It is a service that both saves for you and adds to your comfort and health.

You can continue to enjoy this service and aid in extending it still further by serving Armour Oval Label foods on your table.
